

## JUMP START

Our new autism first intervention/early intervention program, JumpStart is kicking off with a Autism Speaks–sponsored conference on March 9th. JumpStart is a California regional center vendorized one–week intensive parent and child training for families with a recently diagnosed autistic spectrum child. Please come if you’re interested; and please spread the word. Feel free to post this attachment or forward it to whomever you think might be interested. The conference is open to parents and professionals. More information about the conference and about JumpStart as well as registration is available at [www.autismjumpstart.org](http://www.autismjumpstart.org). Hope to see you there!
