## Free PreK

For children of eligible families who will be four years old by December 2nd

The San José Unified School District (SJUSD) preschool program prepares students with the critical foundations they need for their academic career – from kindergarten through adulthood. The program offers an age-appropriate curriculum that focuses on the whole child by encouraging active exploration, developing problem solving skills, building relational and self-help skills, as well as promoting a healthy self-esteem. The preschool program offers 3-hour part-day sessions (am & pm) at several of our San José Unified elementary schools.
